IN THE CLAIMS:

Kindly replace claims 1-12, and add new claims 13-20, as follows.

1. (Amended) A method for integration of a field device in an installation control system, wherein the installation control system has a communications network and a control station, the method comprising:

- A8
- a) transmitting, by the field device, a functional description of its device functions to the control station in a standardized form;
 - b) installing functions associated with the field device on the control station; and
 - c) configuring communications links between the device functions and functions of the control station.
